THE NEW SYSTEM. Mr. Hooper discusses the new system of caring for individual lots, which he says has met with general approval; gives an itemized statement showing that foll hot are being thus cared for, yielding an income of \$1.150; states that seven sections are being from paper to 1300 with the treasurer, and adds that he thinks all lots cared for with be placed in the hands of the company in a tew years. The prices for attending to lots range from \$10 \$10.

EXCLAIMENT 1975.

The Superintendent entineer: I desire to call your attention to a number of lots in the old part that are registered on the tooks as sold, which lots have nave been used or cared for. Is it possible that these lots could be relative and disposed of? The city has an ordinate requisiting such lots in its conseteries providing that they be advertused in the papers, and if allowed to remain unclaimed for a certain length of time are reasid. If this could be done, or has manuar rediem such lots, the tendency would be to much improve certain localities made of jectionable by lots mentioned. To facilitate convenience in selling lots I have drawn a sectional map of new grounds on a 25-foct scale, with measurements and lines of lots, mumber supposed test in save, and price attached, and names of the sold lots written on lot. White this was a great deal of work, I feel amply repeal for the convenience it affords: is inderstood by priminseers of lots, and prevents many mistakes which occurred so easily under the old system.
